OBJECT AUTOMATION  
SYSTEM SOLUTIONS

## About Us

Founded in 2001, with headquarters in San Diego, USA and Chennai, India, Object Automation is a global technology solutions provider built on three foundational pillars: Tech Research, Tech Development, and Tech Enablement. For over two decades, we have partnered with academia, industry, and government to deliver transformative solutions bridging innovation and real-world application.

## OBJECT AUTOMATION SYSTEM SOLUTIONS

### Tech Enablement for Academia & Industry

# Our Offerings

We collaborate with leading universities to create Centers of Excellence and deliver tailored academic programs designed to equip students with industry-ready skills. Our training portfolio includes Generative AI, Quantum Computing, Cybersecurity Analytics, FPGA-Based Computing, and Data Science with Machine Learning Workflows. Through workshops, internships, and hands-on projects, we ensure learners experience real-world applications of cutting-edge technology.

## Our Partners

What Our  
Clients Say

"Object Automation transformed our research into a real-world solution in record time." –  
University Partner

"Their expertise in AI and HPC gave us a competitive edge in product development." –  
Industry Client

Object Automation  
System Solutions

# Why Choose Us

## **Global Reach**

Offices in India & USA  
enable 24/7 collaboration.

## **Proven Expertise**

20+ years of experience  
delivering research,  
development, and  
enablement.

## **Comprehensive Delivery**

From idea to deployment,  
including training and long-term  
support.
